

CLEAN COPY OF SECTION OF CLAIMS - PAGE 7

Claims

It is claimed

1. Apparatus for the cleaning of interior pipe walls by means of a coil spring (2) forming a spring shaft
5 (1) with windings (3, 3a, 3b, 3c) of spring steel and with a rotation axis (RA) and a coiled winding axis
(WA-WA), the windings (3, 3a, 3b, 3c) having at least on their exterior (4) a cross section different
from the circular shape, characterized in that at least the exterior (4) of the windings is profiled such
that the spring shaft (1) itself acts with at least one edge (K) scrapingly on contamination of the pipe
walls.
